

World Mechanics

These are two domino chains that have already started to fall; Show how both groups topple.

Cultural Life

Generate adding beside this scene the classic passage from the corresponding famous work that describes this episode.

Earth Cycles

Half a month later, on a night with a bright moon and few stars, what does the scene look like?

Public Conduct

What will happen if someone cuts in line?

Material Change

This is a salt field; after many sunny days, What will happen?

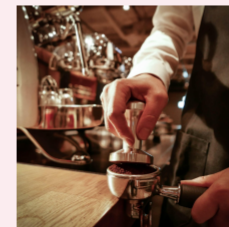

Public Systems

An ambulance is rushing to help someone; what happens on the road next?

Everyday Living

What happens next?

Skilled Action

The barista is flattening the coffee powder, what series of actions will he do next?

Object Handling

This box is too high. How should the characters in the picture use tools to get to the box?

Living World

What does the frog do when it sees a small insect fly by?

Visual Editing

Generate the process of changing dot plot to histogram

World Knowledge

Human Centric

Logic Reasoning

Information-Based

Knowledge Media

Based on the "Attention Is All You Need" paper and the picture, a subsequent LLM technology overview video is generated, including an introduction to the principles of Word Embedding and Self-attention methods.

Creative Expression

The traces of lipstick are transformed into pieces of real velvet roses, covering the entire picture.

Process Timeline

Give the change process in the 10 months after the fertilization of sperm and egg.

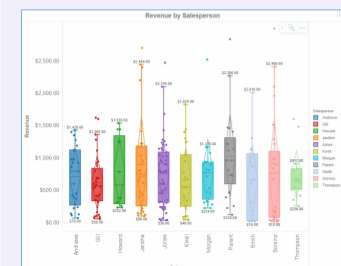

Inside an LLM

Data Reading

I have questions about the input chart. Please help explain and answer them in a clear and easy-to-understand way. The questions are as follows: What is the minimum revenue for the salesperson with the highest median revenue? Which salesperson has the highest maximum revenue? List the salespersons with revenue greater than \$1,500.00 in descending order of their maximum revenue.

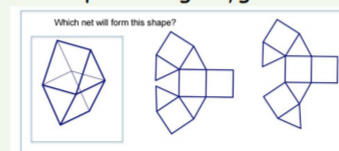

Experimental Science

Please use the tools in the picture to complete the experiment of photosynthesis producing oxygen.

Spatial Geometry

Use the input image as the first frame to solve the problem and give the solution process.

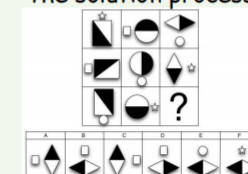

Quantitative Math

Use the input image as the first frame to solve the problem and give the solution process.

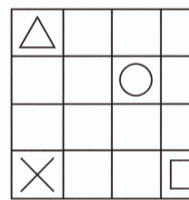

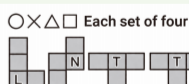

Find a and b if A is not full rank.

$$\text{tr}(A) = 5$$
$$A = \begin{bmatrix} a & b \\ 2 & \frac{(7-11a)}{3} \end{bmatrix}$$

Pattern Discovery

Find the pattern, and give the pattern in the question mark which one should be chosen?

Logic Puzzles

Fill in the remaining shapes into the 4x4 square grid so that each of the four types of shapes: circle, cross, triangle, and square appears 4 times and meets the arrangement rules of the question. Solve the problem and give the solution process.
